

February 5, 1960

February 4th, 1960

Dr. Ernest Wolf,
St. Jakobstrasse 25
Basle, Switzerland.

Dear Ernest:

To further my letter to you of January 28th, you will be pleased to hear that Mr. David Rockefeller had a meeting yesterday with Dr. Nagy, which I was unable to attend on account of my present physical condition. It was a great success.

Mr. Rockefeller pointed out that it may take considerable time before his own project is realized and suggested immediate collaboration, the form of which I shall discuss with Mr. Rockefeller on my meeting with him in a week or so, when I am better able to travel. In the meantime, Mr. Rockefeller contacted the Chairman of the New York Port Authority, which is the principal mover of the scheme for New York and which is a multi-billion dollar independent concern, to start technical discussions on collaboration. I shall keep you advised.

Meanwhile, I take much pleasure in enclosing what amounts to an official endorsement of the U.S. Government, that is to say, FOREIGN COMMERCE WEEKLY, February 1, 1960. You will note on page 31, that the U.S. Department of Commerce itself will act as distributing center together with its 33 field offices, on our literature and as source of information on our enterprise.

In the meantime, Cushman and Wakefield have circularized 1500 of the most important firms in the U.S. and between the U.S. Department of Commerce and Cushman and Wakefield, we have good reason to be confident.

With best wishes, I remain,

Sincerely yours,

LMH:DC
Encl.
